

ONLINE VEHICLE TRACKING, MONITORING AND MANAGEMENT SYSTEM WITH GLOBAL POSITIONING SYSTEM (GPS)

by: ROMMEL V. EPINO

It is inevitable that every time we decide on matters which we needed most, we always take into consideration the cost (first and foremost), its accessibility and our convenience. Most often than not, we go with the flow; with what is 'in' and what everybody is talking about. We always assume that if it worked with them, then it will definitely work with us as well; not knowing and digging deeper into the smallest details. Sometimes, with our failure to do so, we end up deciding on something which is definitely not for us. It would be best; therefore, to explore all avenues, leaving no stones unturned and further seeks for better alternatives. This may, in turn, let us see what is there beyond the norm...the usual...the common and who knows this might be the right one and the best for us.

The basics of Vehicle Management with Global Positioning System (GPS) are as follows:

- Vehicle Profile
- Vehicle Photo Upload
- Repairs and Maintenance
- Trip Ticketing
- Gasoline Mileage
- Financing
- Insurance
- Accidents' Information
- Drivers' Information
- Vehicle Disposal

The Global Positioning System has proven over time its efficiency to businesses especially those which are focused on Vehicle/s Management. Reliability of this system and the technology has not been questioned as it is space-based; making all of its generated information on the vehicles' location and time are seamlessly accurate. This accuracy remains so for as long as there is no obstruction in sight; whatever the weather condition may be and wherever on and near the Earth.

To incorporate all of the above-mentioned details into your business would entail sacrificing a big amount on your budget. Such amount is so big that the Small and Medium Enterprises could not afford. Much as they wanted to have it on their businesses; as they could not afford such; they would just make do with manual vehicle management. The manual way of managing vehicles would most often than not, produces manipulated and error-laden reports.

VEHICLESTREET

VehicleStreet has been conceived thru continuous research and meeting of objectives. It addresses the needs and requirements of businesses' and households' online vehicle tracking, monitoring and management.

vehiclestreet.com is user-friendly and is accessible through any device with an internet connection. Its Global Positioning System (GPS) is enhanced, allowing each and every subscriber to enjoy and maximize its benefits. The following features are likewise included in the VehicleStreet package:

- Real-time monitoring and tracking of vehicles as a group or individually.
- Track and trace capabilities with zoom-in features thru various maps and satellite images for clearer views.
- Remote execution of functions like locking and unlocking and alarm enabling and disabling.
- Enable communication between driver and the operator or the management anytime, anywhere.
- Setting of parameters and limitations for Check-In Places, Geographical Boundaries and Hot Spot Places.
- All of your vehicles' waypoints and data are automatically saved for your retrieval and reference – all 365 days of the year.
- Notifications for Status Reports like: SOS Alarm, Device Battery Cut, Check In/Out and a lot more.
- Makes possible inviting a friend or viewer to track and monitor a specific vehicle.

CONCLUSION

A business which is primarily engaged in Vehicle Management would rarely say No to an Online Vehicle Tracking, Monitoring and Management System; what more for a system which lets you feel like you are actually sitting next to your driver inside the vehicle. All these and more for budget-friendly rates...who would say No?

VehicleStreet is a system which was carefully and diligently thought of and backed-up by continuous researches. Your convenience, its accessibility and cost-effectiveness were thought of factors throughout the development of vehiclestreet.com.

VehicleStreet offers subscription packages which are surely knock-offs.

We are looking forward and are very eager to show you more of how VehicleStreet can be an additional asset to you and your company. Reach us via our hotlines: (632) 844.9791 to 93 and/or email us at vsales@vehiclestreet.com. Feel free to browse thru www.vehiclestreet.com to learn more about us.
